

Made by  
**MAHLE**

# OzonePRO

Fully-automatic electronic  
device for sanitation.

**OzonePRO is the professional sanitizing system  
for your shop and protects against the spread of  
most bacteria and viruses.**

- Easy to use, safe and 100% environmentally friendly
- Fully automatic
- For car / truck / bus interiors
- To sanitize your workplace
- Ideal solution for detailers and shops

Safeguard  
against  
bacteria &  
viruses!

# MAHLE

# MAHLE OzonePRO

## Your source of safety.

*OzonePRO is the professional sanitizing system that your shop should include as part of its maintenance service.*

Declare war  
on viruses on  
the vehicles  
in your shop!

OzonePRO offers an intelligent procedure for consistent results, as the sanitizing process is entirely guided by the special software: through the sensor, it analyzes the concentration rate of the gas fed into the vehicle interior until the ideal threshold is reached, maintaining its level throughout the time needed for sterilization to be achieved, through a specific strategy based on the type of vehicle and its inner condition.

**The system also eliminates bad odor caused by bacteria, fungi, and molds lurking in the vehicle interior.**

### **Why is sanitation of the vehicle cabin so important?**

Viruses, bacteria, and molds can lurk in upholstery and A/C circuit of vehicles entering your shop. For your safety, and the safety of your employees and customers, a thorough sanitation of the vehicle interior is recommended and more valid than ever before.

Ozone ( $O_3$ ), widely used to disinfect sanitary facilities, makes viruses that may be found on surfaces inert, while sterilizing the vehicle interior to remove molds and bacteria.

Recognized as a natural disinfectant, Ozone offers a wide range of applications: its sanitizing action can be applied to air, water, surfaces, and fabrics.

# Why choose Ozone?

*Ozone is a natural gas, widely used in sanitary facilities due to its ability to oxidize and disrupt the molecular structure of bacteria, fungi, and viruses.*

Every single molecule of Ozone ( $O_3$ ) is generated in nature through electric discharge: by separating some molecules of Oxygen ( $O_2$ ) into single molecules of atomic Oxygen ( $O_1$ ), a new 3-atom molecule can be formed.

The new molecule is actually short-lived: in fact, Ozone decays rapidly, breaking down into oxygen just a few minutes later.

OzonePRO, from MAHLE, applies the same technology to its own processes.

Through Corona Effect ceramic plates, Ozone is generated and pushed into the environment, according to the sanitizing procedure parameters. This technology allows us to generate large quantities of ozone in a short time. This helps to reach the required level of saturation rapidly, thus greatly increasing efficiency compared to other existing systems.

## The Sensor

The special built-in sensor plays a key role. By analyzing several environmental parameters, it enables the software to only **maintain saturation as long as necessary** to ensure elimination of pathogens, while adapting operation to the detected parameters, thus avoiding any oxidation damage inside the vehicle or in the treated environment.

Various **ministries of health** around the world recognize the use of ozone as a disinfecting agent and disinfectant in the treatment of air and water: a natural way to sterilize areas contaminated with bacteria, viruses, spores, molds, and mites.

# OzonePRO, always ready for use.

It can be  
used at  
any time.

The system is made up of a high-capacity (5,000 mg/h) portable **Ozone Generator**, integrated with the exclusive **Multifunction Sensor**, at the core of the system, which analyzes, calculates, and guides all the sanitizing operations.

Extremely handy, it can be used inside the vehicle cabin, thanks to the specific 12V socket to be connected to the cigarette lighter socket.

Setting a time is  
not enough!

Every environment has different requirements of how long and with how much ozone it should be handled, depending on the specific **volume of air, temperature and humidity, interiors' composition and level of cleaning**. Time should only be considered once the proper saturation level has been reached in the environment.

This task is handled by the special Multifunction Sensor, which in fact controls every step of the sanitizing process based on the evolution of the vehicle's environmental and internal parameters.

Control over the sanitizing procedure ensured by OzonePRO prevents all those circumstances that may jeopardize the final result: excessive ozone persistence, failure to reach proper saturation, or inadequate saturation times.

## MAHLE expertise

The design and engineering of functional logics ensuring perfect sanitation is obtained thanks to the extensive expertise of MAHLE, global leader in the manufacture of automotive filtration systems.

## Multifunction Sensor

- Ozone
- Humidity level
- Temperature
- Barometric pressure

# Smart operability guaranteed by MAHLE.

Just press Start  
and it will do the  
rest!

Adding OzonePRO as part of your work  
routine is super simple.

Just place it inside the environment to  
be sanitized, press Start and the device  
will do the rest, informing you when  
the process is complete and the area  
sanitized and safe.

Providing this service  
above and beyond  
the 'add-on' option  
during maintenance  
can be profitable.

Schedule appointments  
today for not only  
automobiles, but also  
semi truck cabs and  
RVs to experience the  
benefits of OzonePRO.

OzonePRO protects  
against the spread  
of most bacteria  
and viruses; it is the  
perfect add-on service  
for Fleets and other  
shared vehicles.

O3-Easy – your  
dedicated app.

Just like all the other devices from  
MAHLE Aftermarket, OzonePRO has its  
own App, allowing to manage the device  
and monitor its processes remotely: O3-  
Easy.

Sanitation  
Report.

At the end of the process, the Sanitation  
Report can be sent or printed, and given  
to your customer, thus giving value to the  
excellent service you are providing.

## Technical Features

Capacity	5,000 mg/h
Bluetooth®	+
Sensor	Ozone, Temperature, Humidity, Barometric pressure
Status indicators	LED
Remote Control App	Apple App Store / Google Play Store
Power	70 W
Power Supply	120v/220v power supply optional
Dimensions	360 x 280 x 288 mm
Weight	6 lb. 10 oz / 3 kg

## Products

OzonePRO Generator w/AC Power Supply Combo	PN 490 80003 00
OzonePro Generator 12VDC	PN 490 80001 00
AC to DC Power Supply 220V/120V	PN 490 80002 00
